

APPLIED MATH SPOTLIGHT

DYLAN ARCEJAEGER

I primarily enjoy designing and learning pedagogical approaches for interactive-based learning of math in the college-level classroom. My favorite class to teach is Multivariable (Vector) Calculus because there's a common misconception that the class is really hard when in fact, as long as you can draw, it's quite simple!

About Me

- I've been rock climbing for 14 years
- I've coached rock climbing professionally
- I was a collegiate tennis player
- I've built my own PC and car (wrx)
