

APPLIED MATH SPOTLIGHT

LIHONG ZHAO

My research lies at the interface of dynamical systems, numerical analysis, inverse problems, and their applications in biological systems, to answer questions in life sciences relating to public health and ecosystem balance.

About Me

- I put my cell phone on silent 24/7 unless there is a specific reason not to
- Outside of math, I enjoy playing Guzheng (a Chinese plucked zither). The last time I performed publicly was 6 years ago, February 2015 in Lafayette, LA.

POSTDOCTORAL RESEARCHER

siam | Student Chapter 
UNIVERSITY OF CALIFORNIA MERCED
