

APPLIED MATH SPOTLIGHT

VALENTIN DALLERIT

My research focuses on numerical methods for large systems of differential equations. I'm interested in the development and implementation of such methods as well as their applications to weather and climate models and plasma physics. I hope to join a national lab after my Ph.D.

About Me

- I like hiking and swimming when I'm not in front of my computer.
- I enjoy solving sudoku-like puzzles and programming challenges.
- Recently, I started tinkering with electronics and microcontrollers.
- I enjoy baking bread.
